

## **Assessment Design** and Implementation **Using PADI Tools**

PADI Design System is used to:

- Articulate the purpose and rationale of a particular assessment
- Develop design patterns, task templates, and task specifications detailing the qualities required in the assessment tasks

Authoring System is used to:

- Generate instantiated tasks that will be delivered to students following the task specifications
- Calibrate instantiated tasks before widespread administration

Assessment Delivery System is used to:

- Present tasks to students and gather student responses
- Evaluate student work and compute estimates of student proficiency or access separate applications to perform those functions
- Update the Student Database with new proficiency estimates

## **PADI: Principled Assessment Designs for Inquiry**
